### Bio-Glass

Bio-Glass™ solid surfacing for countertops, walls, floors, and other applications is made from 100% recycled glass, heated and agglomerated under pressure. There are no binders, colorants, fillers, or other admixtures. Depending on color, the product is either pre- or post-consumer, or a blend. The translucent, nonporous material is available as 110-inch by 47-inch slabs, about 4.7 inches thick with a lightly textured, slip-resistant surface; smooth-surfaced slabs are also available, approximately 4 inches thick. The product is currently available in white and light green, with blue, brown, and dark green to follow.
